## DATA ANALYSIS & COMPUTER SCIENCE TRAINER

Master's in Computer Science with a research focus on deep learning and data science. I train individuals, university students and organizations in Excel, Power BI, Python and SQL, and prepare candidates for IC3, MOS and Power BI international certifications.

## EDUCATION

### Master's Degree in Computer Science — 2022

*Department of Mathematics, Faculty of Science — Assiut University*

Research interests: **deep learning** and **data science**. Two scientific papers published.

### Preliminary Master's Degree in Computer Science — 2017

*Department of Mathematics — Assiut University*

Grade: **Excellent**

### General Diploma in Education — 2011

*Faculty of Education — Assiut University*

Grade: **Good**

### Bachelor's Degree in Computer Science — 2005

*Department of Mathematics, Faculty of Science — Assiut University*

Grade: **Very Good**

## PUBLICATIONS

**Paper published in an IEEE International Conference**

*IEEE International Conference, Alexandria — 2019*

https://ieeexplore.ieee.org/abstract/document/9478799

**Paper published in Assiut Journal of Science**

*Assiut Journal of Science — January 2022*

https://aunj.journals.ekb.eg/article_219648.html

## TRAINING & COURSES

- Data Analysis Nanodegree certificate — **Udacity**, February 2022
- Microsoft Office Specialist (MOS) — Excel Specialist
- Statistical analysis in scientific research using **SPSS**
- Designing an electronic course (E-Course) & activating an E-Course
- Applications of information technology in teaching
- Preparing a proposal for a competitive research project
- English Language Proficiency Test (ELPT) certification
- A+ certification — Technology Center, Assiut

## PROFESSIONAL STRENGTHS

- Organized and dependable, with a strong sense of responsibility toward the work
- Strong communication skills with individuals and groups of trainees
- Continuous learner, able to acquire demanding technical skills quickly
- Experience preparing candidates for IC3, MOS and Power BI exams

## TECHNICAL SKILLS

| | |
|---|---|
| Microsoft Excel | Advanced |
| Power BI | Advanced |
| Python | Very Good |
| SQL | Very Good |
| HTML & CSS | Very Good |
| SPSS | Very Good |

## TOOLS

MS Office 365 · Power BI · MS Teams · OneDrive · Cloud Computing · SPSS · Deep Learning · Data Science · Touch Typing

## LANGUAGES

| | |
|---|---|
| Arabic | Mother tongue |
| English | Fluent |

## CERTIFICATION TRAINING

- IC3 Digital Literacy — Computing Fundamentals, Key Applications, Living Online
- MOS — Excel, Word, PowerPoint (Office 2019 / Microsoft 365)
- Microsoft Power BI Data Analyst (PL-300)

## SELECTED PROJECTS

### SecureVision — Surveillance Systems E-Commerce Store

FULL-STACK WEB APP

A full-stack e-commerce platform for surveillance systems (IP cameras, DVR/NVR, access control and accessories). Product catalogue with search, category/brand filtering and sorting; shopping cart and checkout; order confirmation and history; an admin dashboard with revenue, order and top-product KPIs plus full product and order management; and a three-tier content-based recommendation engine. Security layer with bcrypt password hashing, role-based access control, parameterised queries and CSRF protection.

**Tools:** Python 3.11, Flask 3, SQLite, Jinja2, Bootstrap 5, JavaScript, HTML5, CSS3, bcrypt

github.com/essamkhalifa0284/Online-store-for-surveillance-cameras-and-modern-systems

### Healthcare Diabetes — Data Preprocessing & Exploration

DATA SCIENCE

An exploratory analysis and preprocessing pipeline for a diabetes healthcare dataset: data summarisation and type inspection, detection of invalid zero values and mean/median imputation, IQR-based outlier capping, and feature standardisation with StandardScaler — supported by distribution, box and class-balance plots, with the cleaned dataset exported for modelling.

**Tools:** Python, Jupyter Notebook, pandas, NumPy, Matplotlib, Seaborn, scikit-learn

github.com/essamkhalifa0284/preprocessingHealthycare_dataset

### YouTube Playlist Downloader

PYTHON AUTOMATION

A Python script that iterates over a list of YouTube URLs and downloads each video at the highest available progressive MP4 resolution, with a live progress bar and per-URL error handling so a single failing link does not stop the batch.

**Tools:** Python, pytube, tqdm

github.com/essamkhalifa0284/download_videos_list

### To-Do List Web App

FRONT-END DEVELOPMENT

A lightweight web app that lets the user add and delete tasks, with the add/delete logic written in vanilla JavaScript and the interface styled in CSS — built as a teaching example of DOM manipulation fundamentals.

**Tools:** HTML, CSS, JavaScript, DOM API

github.com/essamkhalifa0284/todo-list

> **All repositories:** github.com/essamkhalifa0284 — six public repositories covering the four projects above (the e-commerce store and the downloader each have a mirror repository).
